

NANO-SOLUTION  
WITH AIRQ-TECHNOLOGY

# AROMEA PRO

## GREAT FRAGRANCE PERFORMANCE, COMPACT IN DESIGN

The Aromea Pro line from the Nano device family consists of powerful fragrance models that hang on the walls of large rooms. But they don't have to. The Aromea Pro is also available as a model for light rail installation. The entire fragrance system is simply hooked into the light rail by means of a standardized connection, locked - air design with the spirit of the times. Another design for this performance class of Aromea Pro fragrance systems is also available for use in supply air ducts. Starting fragrance marketing couldn't be easier.

Technology	Cold Evaporation Nano AirQ Technology
Fragrance cartridge	500 ml completely recyclable
